

Empower Your Data Security with Colocation Services from Telesystem

You have a choice...

OR

Data Center 1 | Ohio

The significant security choices facing every business decision maker cannot be overstated. Taking risks with financial assets can translate to catastrophe for your business and sound planning is fundamental to the life of your business. Your data security is no different. Risk presents itself in the form of natural disaster as well as security threats. Often the appeal of managing in-house servers comes from knowing where your data resides. Telesystem offers you that same peace of mind with colocation facilities built to withstand natural disaster, monitored by industry experts 24/7 to ensure your data is secure.

Be confident your storage and server solutions align with your high standards for protecting your business from risk - schedule a tour today.
