- **Scalable** to meet mobile device demands.
- **24x7** proactive monitoring and technical support.
- Customizable **URL landing page**. Add your own logo and usage instructions.

## Fully managed wireless solution for Healthcare

Provide anytime, anywhere access without compromising network and patient security. Telesystem's Managed WiFi seamlessly integrates to deliver a scalable enterprise-class solution that will support your organization's current and future technology requirements. Our Managed WiFi includes all necessary access points (APs), switches, and peripherals, as well as assessment, design, cabling, installation, engineering, hosted management, 24x7 monitoring services, and post-installation maintenance and updates. With Telesystem's Managed WiFi, you can offer your patients and guests the fast, open WiFi access they expect – along with the private wireless access you and your staff need to run your clinic securely and efficiently.

Telesystem designs, configures, installs, monitors and manages your secure wireless network freeing you from the burden and cost of setting up and managing a wireless network, and allowing you to focus more on your patients' needs.

## Benefits of Enterprise Managed WiFi

- **Management** – Freedom from having to employ and monitor on premise in-house support for the constant maintenance of the wireless networks.
- **Security** – Full HIPAA compliant WiFi access through our virtualized management console and architecture ensures that the patient data never leaves the local network. Only the management, control and signaling traffic is sent back to the monitoring console.
- **Savings** – Telesystem handles support and equipment replacement costs.
- **Scalability** – Quickly add or subtract Access Points to meet demand.
- **Reliability** – Proactive, preemptive monitoring assures minimal downtime due to outages. 24x7x365 technical support.
- **Affordability** – The end-to-end Managed solution avoids additional installation, replacement hardware, and upgrade costs offering a shift from capital expenditure demands to operational investments.
