

*The Accession client can be used to make or receive calls from your desk phone, your PC or MAC, and your mobile devices.
The following guide covers how to install the mobile client.*

Compatibility

Accession is available for iPhone 3GS, 4, and 4S, iPads running iOS5 or later, and Android phones and tablets with ARM chips running 2.3.3 (Gingerbread) or later version.

Credentials

To use and log into the application, you will need your **direct dial phone number** and voicemail or CommPortal **password**. If you don't have this information, please see your system administrator or call Line Systems.

Installation

1. **Search** for *Accession Communicator* in the App Store or Google Play
2. **Download** the app to your device
3. After the download completes, tap the app icon  to launch the application. The first time you open the application, be sure to allow all access to your contacts, notifications, and microphone.
4. Tap the **Log in** button.
5. In the Choose Carrier screen, type *Trial providers* in the search box. Note, you must type the whole search term in order for the list to populate.
6. Scroll down in the list and choose **Line Systems**.
7. In the Terms of use screen, read the Terms & Conditions, allow incoming and outgoing calls, then touch **Accept** to continue.
8. In the Login screen, enter the credentials of your ten digit phone number and CommPortal (voicemail) password then tap **Log in**.
