

Telesystem Accession Softphone for Mobile or Desktop

Your working life moves constantly from desk to laptop to mobile smart phone to iPad. Now you can use all the features of your Telesystem phone services from almost any device whether at your desk, at home or on the move.

Your Telesystem phone service can be used to make or receive calls from your desk phone, your PC or Mac and your mobile devices. Look up your contacts, make and receive voice calls or chat with colleagues, no matter which device you are using or where you are.

With Accession Softphone, you can seamlessly move from device to device, or from cellular to WiFi, even in the middle of a call.

Save Time, Do More

Here are a few of the things you can do with Telesystem Accession Softphone when paired with your Telesystem desk phone service:

Call from anywhere. Make and receive calls on your mobile as though you were at your desk. With single number convenience, the person you call will see your Telesystem desk phone number. Now you can choose who sees your mobile number.

Receive calls on any device. When someone calls your primary number, the call will appear on one or more of the devices that you've set up. This can include your desk phone, mobile phone, PC or Mac and tablet devices. You answer the call on whichever device is most convenient for you.

Seamlessly transfer calls. Start a call on WiFi, switch it to cellular if you move out of WiFi coverage. Move a call to your fixed line when you arrive at the office. Take a call with you by switching it from your desk phone to your mobile, or even to your tablet. Save your mobile minutes for when you're actually mobile.

Call Manager. The call manager helps you with all these features. It also makes it easy to mute calls, transfer calls, make three-way calls, place calls on hold, record calls (where local laws permit) and adjust the microphone or headset volume.

Choose How People Reach You

Set up your call forwarding choices and “Do Not Disturb” options in the Call Manager. Choose to send all your incoming calls to another number or straight to voice mail. Specify special handling for calls from VIPs. Single number convenience means that your callers need only one number, but you choose where and when to be reached. And the choices you make on one device can apply to all your connected devices. You’ll have more control over your working time to maximize your productivity.

Powerful Features, Easy to Use

One number reaches you anywhere and you can manage your calls and contacts from anywhere too.

Integrate your contacts. See and access all your contacts - including the corporate directory - on any device. Search, call and edit any of your contacts effortlessly and keep them synchronized.

Conference calls. It’s simple to set up and manage audio conferences from your desktop.

Chat. You can send instant messages to other people in your corporate directory who are using the same service, no matter what device they’re using.

Softphone for your PC. Add a headset to your desktop or laptop then make and receive audio calls from your PC just like you would on your desk phone - the person you’re calling sees your usual desk phone number, as though you were calling from your desk.

Ready for Business

Telesystem Accession Softphone is integrated with your hosted suite of business services. You can use the same valuable services that you see from your office extension such as extension dialing, auto attendant and automated call distribution. Isn’t it nice to have an integrated communications suite that’s ready for business?

Easy Set Up

It’s easy to download and install the app on your smartphone, tablet, PC or Mac.

Our mobile application works on these devices:

- Android phones and tablets with ARM chips running 2.3.3 (Gingerbread) or later version
- iPhone 3GS or higher running iOS5 or later
- iPad running iOS5 or later

Reliable, Secure Service

Telesystem Accession Softphone is fully integrated into our advanced IP voice services network with reliable performance and great support. Your sensitive information is safeguarded with our industry standard security and privacy measures. When team members can work from anywhere, our Softphone becomes an important part of your business continuity strategy too.

Re-imagine Your Communications

Telesystem Accession Softphone saves you time and helps you work and communicate more effectively - wherever you are. It’s time to get ahead with Telesystem Softphone!
