TARIFF FORMAT

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Board. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc., the most current page number on file with the Board is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.a
 - 2.1.1.A.1.a.1
- D. Check Sheets - When a tariff filing is made with the Board, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Board.

2.12 Dialing Parity Plan

2.12.1 Purpose

The purpose of this Dialing Parity Plan ("Plan") is to permit customers to route intraLATA calls automatically, without the use of access codes, to an interexchange carrier ("IXC") of the customer's choice. The IXC chosen by customers must establish itself as an access customer under any applicable tariff that WiMacTel, Inc. ("Company") will file prior to launching service in Delaware. This Plan applies to services which may be made available at a future date using the Company's access facilities. If the Company provides local dial tone service(s) by reselling facilities obtained from Incumbent Local Exchange Carrier(s) ("ILECs"), (a) the Company will implement dialing parity wherever it is made available by the ILEC from whom the Company purchases local dial tone service for resale, and (b) elements of this Plan pertaining to exchange access service orders will not apply.

2.12.2 Implementation

The Company will notify affected intraLATA IXCs approximately sixty to ninety days prior to the date that the Company expects to begin providing local service in Delaware and advise that a Presubscription Information Package will be provided upon request. The Presubscription Information Package will explain how exchange access service(s) can be obtained and will include the following:

End Office names(s)
End Office Location Common Language Location Identification ("CLLI")
Equipment type
NPA/NXX(s)
LATA
Implementation Date

Carriers will have the options of offering intraLATA service only or intraLATA and interLATA service and participating in all market area or in a specific market area in Delaware.

Effective: November 13, 2014

SECTION 2 - REGULATIONS, (CONT'D.)

2.12 Dialing Parity Plan, (Cont'd.)

2.12.3 Carrier selection

When the Company offers facilities-based local dial tone service(s), it will implement a full 2-PIC carrier selection methodology. As stated in Paragraph I above, if the Company provides local dial tone services by reselling facilities obtained from ILECs, it will rely on the ILECs facilities to provide the full 2-PIC capability. With the full 2-PIC methodology, customers will be able to presubscribe to the same or different participating telecommunications carrier(s) for intra and interLATA toll calls. IntraLATA presubscription will be provided on all eligible residence and business lines.

Prior to offering local dial tone services, the Company will establish processes to provide customers with an opportunity to choose their intra and interLATA toll carrier(s) Company contact representatives who communicate with the public, accept orders, and serve in customer service capacities will be trained to explain to customers the availability of 2-PIC equal access, and assist in implementing their initial PIC choice or in changing their PIC for intraLATA and interLATA toll calls. The Company will process intraLATA PIC selections in the same manner and in the same time intervals that apply to interLATA PICs.

Effective: November 13, 2014

SECTION 2 - REGULATIONS, (CONT'D.)

2.12 Dialing Parity Plan, (Cont'd.)

2.12.4 A Customer Selecting a PIC

When local dial tone services are offered by the Company, customers contacting the Company and requesting local dial tone service will be informed of the opportunity to choose both an intraLATA and interLATA PIC. If requested by customers, the Company will provide a list of IXCs, including the Company, that are access customers and are maintaining a relationship with the Company pursuant to the provisions of the Company access service(s) tariff. The list of participating intra IXCs will be presented to customers in a competitively neutral manner, and IXCs will be identified to customers in random order. The Company contact representatives will not comment on customers' choices of their intraLATA toll carrier.

Company customer contact representatives will process customer initiated request(s) to have the Company established as their intraLATA PIC selection. Customers selecting an intraLATA toll carrier other than the Company will be provided with the selected carriers toll-free number (if provided to the Company by the carrier).

If new line customers, including customers adding lines (with a separate number), do not select a participating carrier, they will be assigned a No PIC. Customers who cannot decide upon an intraLATA carrier at the time of order, will have 30 days following placement of the their service order to select an intraLATA carrier without charge. In the interim, they will be assigned a No PIC designation. After the 30-day period, the Company will assess a PIC change charge. Customers assigned a NO PIC designation will be required to dial an access code to reach an intraLATA toll carrier's network.

The Company contact representatives will not discuss alternative carrier rates or services and will not provide customers with Carrier Identification Codes or access code dialing instructions.

Customers selecting intraLATA toll carriers other than the Company will be provided with the selected carriers toll-free number (if provided to the Company by the carrier).

A PIC change charge will be incurred and billed to a Company customer for each eligible line where an intraLATA PIC change is made. The Company anticipates it will offer IXCs the option of having the intraLATA PIC charge billed to the IXC or the customer.

Company contact representatives will not attempt to dissuade customers from changing their intraLATA PIC and will not discuss alternative carrier rates or services. The Company will not provide customers with Carrier Identification Codes or access code dialing instructions.

2.12.7 PIC Freezes

PIC freezes may be provided at any time upon customers' requests. The Company will accept the use of three-way calls among the customer, the Company and an IXC to remove intraLATA PIC freezes. The Company will still follow the verification procedures for PIC changes (e.g., independent third party verification, written letter of agency, electronic authorization) as provided for by the Federal Communications Commission and Delaware Commission rules. The Company understands that carrier-to-carrier penalties for unauthorized intraLATA toll charges may not be imposed.

IntraLATA carriers that desire to become Company access customers shall notify the Company via letter or telephone call of their desire to obtain exchange access service information or shall obtain and complete an Access Service Request(s) ("ASRs") form and provide the completed form to the Company and to the owner of the Access Tandem. The Company will send each requesting carrier an information package describing the Company's service, processes and applicable tariffs. Once the Company receives and processes a carrier's ASR, the carrier will be added to the list of participating carriers and, as stated above in Part IV of this Plan, will be identified at random to customers who desire to establish intra and/or interLATA PIC(s). The Company will provide notice switches available for Exchange Access Services to IXCs by identifying the switches in NECA Tariff FCC No. 4. In addition, as stated above in Part II of this Plan, the Company will include a list of available switches in its information package provided to each IXC in response to an inquiry.

To be a presubscribed intraLATA toll carrier, a carrier must have a Feature Group B (FGD) or Feature Group D-like trunk. The FGD or FGD-like trunk(s) must be in place or ordered between the carrier's point-of-presence and the incumbent Local Exchange Company Access Tandem(s). Carriers must determine what facilities they need to handle the intraLATA toll traffic and order the necessary facilities.

All originating intraLATA traffic will initially be routed via the incumbent Local Exchange Company ("LEC") Access Tandem(s). Direct trunks between Company switches and carrier location(s) may be provisioned where traffic volumes warrant.

Effective: November 13, 2014

SECTION 2 - REGULATIONS, (CONT'D.)

2.12 Dialing Parity Plan, (Cont'd.)

Requests from carriers to block traffic or remove customers from their network will not be honored. Calls that cannot be completed to a carrier will be routed to an announcement.

Carriers will be required to submit PIC changes using the Customer Account Record Exchange ("CARE") format via paper medium. The Company will provide carriers with PIC order confirmation and reject information not using the CARE format. Upon request, specific details regarding CARE will be provided to participating carriers.

The regulations set forth in this section govern the application of rates for services contained in other sections of this tariff.

4.2 Charges Based on Duration of Use

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 4.2.1 Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
 - 4.2.2 Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
 - 4.2.3 Timing terminates on all calls when the calling party hangs up or the network receives an off-hook signal from the terminating carrier.

4.4 Special Pricing Arrangements - Individual Case Basis (ICB)

In lieu of the rates otherwise set forth in this Tariff, rates and charges, including installation, special construction, and recurring charges, may be established at negotiated rates on an Individual Case Basis (ICB), taking into account such factors as the nature of the facilities and services, the costs of construction and operation, the volume of traffic commitment, and the length of service commitment by the Customer, as long as the rates and changes are not less than the Carrier's costs of providing the service.
