PRICE LIST FORMAT

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the price list. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Board. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc., the most current page number on file with the Board is not always the price list page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1(a).
 - 2.1.1.A.1(a).I.
 - 2.1.1.A.1(a).I.(i).
 - 2.1.1.A.1(a).I.(i).(1).
- D. Check Sheets - When a price list filing is made with the Board, an updated Check Sheet accompanies the price list filing. The Check Sheet lists the pages contained in the price list, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The price list user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Board.

SECTION 4 - APPLICATION OF RATES

4.1 Introduction

The regulations set forth in this section govern the application of rates for services contained in other sections of this price list.

4.2 Charges Based on Duration of Use

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 4.2.1 Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
- 4.2.2 Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- 4.2.3 Timing terminates on all calls when the calling party hangs up or the network receives an off-hook signal from the terminating carrier.
- 4.2.4 Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- 4.2.5 All times refer to local time.

Effective: June 24, 2016

SECTION 4 - APPLICATION OF RATES

4.3 Rates Based Upon Distance

Where charges for a service are specified based upon distance, the following rules:

4.3.1 Distance between two points is measured as airline distance between the Rate Centers of the originating and terminating telephone lines. The Rate Center is a set of geographic coordinates, as referenced in National Exchange Carrier Association, Inc. Price List FCC No. 4 FCC Access Services Price List, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the Rate Center of the Customer's main billing telephone number.

4.4 Special Pricing Arrangements - Individual Case Basis (ICB)

In lieu of the rates otherwise set forth in this Price List, rates and charges, including installation, special construction, and recurring charges, may be established at negotiated rates on an Individual Case Basis (ICB), taking into account such factors as the nature of the facilities and services, the costs of construction and operation, the volume of traffic commitment, and the length of service commitment by the Customer, as long as the rates and changes are not less than the Carrier's costs of providing the service.

B. Company Network Service Features

1. These features are offered subject to availability of suitable facilities. Certain features may not be available with all classes of services.
2. In the event the Company adds custom calling features to its Network Exchange Bundled Services, such features will be available upon the price list effective date (where technically feasible) to all new Customers. Existing Customers will be informed of the new features availability but must contact the Company to obtain the new features. Any Service Order Charges, which would normally apply, will be waived.

4. Caller ID with Name and Number -Allows a Customer to see a caller's name and number previewed on a display screen before the call is answered allowing a Customer to prioritize and or screen incoming calls. Caller ID records the name, number, date and time of each incoming call - including calls that aren't answered by the Customer.
